

Implementing a Non-Hospital Based Infusion Service in a Hospital-Focused Health Care System

MultiCare Health

- 12 Hospitals
- More than 300 primary, specialty and urgent care locations
- Nine hospital-based ambulatory infusion centers
 - MultiCare Regional Cancer Center
 - Allenmore Ambulatory Infusion Services
 - Pediatric Ambulatory Infusion
- Mary Bridge Infusion and Specialty Services

MultiCare Home Infusion and Alternate Site Clinic

Non-Hospital Based Services are different from Hospital Based Services

Primary Challenges

- Project Management System
- Corporate Compliance
- Revenue Cycle
- IT infrastructure

Primary Benefits

- Built-in referral sources
- Strong provider support allowing collaboration with outpatient clinics
- Access to Medication Assistance
- Collaboration with Specialty Pharmacy
- Offer care difficult to find elsewhere
- Core Alt Site team

“Let’s Figure Out How to Do This”

- Know what to expect working within a larger health care system
- If possible, have an expert consultant on board
- Be flexible
- Nurture a “Can-Do” mindset
- Be prepared to work for it
